QUIRK · HOW THE ROBOT READS

Q-01

Plain robot

No quirk. Fetches every Thing that matches every word.

The baseline: exact words, exact results.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-03

Short memory

Reads only the first 2 word cards of a prompt. It never sees the rest.

Real AI has a context limit too.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-04

Colorblind camera

Ignores color words (and a NOT right before one).

A sensor that can't see a thing can't use it.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-05

Never learned size

Ignores Big and Small (and a NOT right before one).

It was never trained on that idea.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-06

Mixed-up labels

Reads Block as Book and Book as Block.

Bad labels in training teach the wrong word.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-07

Doesn't get NOT

Skips every NOT card, then reads the rest.

Negation trips up real AI a lot.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-08

People-pleaser

If nothing matches, it fetches everything in the room instead of saying no.

Some bots guess rather than admit they're stuck.

Hi, Bot

QUIRK · HOW THE ROBOT READS

Q-09

Strict robot

Fetches nothing unless the prompt has a color word, a kind word, AND a size word.

Some tools need every field filled in.
