

My Server Farm

Farm name: _____

MACHINE SLOTS · 8 max · draw each new machine in a box

GPU RACK

COOLER

GPU rack 5 coins
Cooler 3 coins
Solar panel 4 coins
Battery 3 coins

Power: grid 3 + solar 1 each (hours 1-5) + battery. 1 power runs 1 rack. Heat: 1 Cooler = 2 full-speed racks. Full rack 3 jobs, slow rack 1. Battery stores 2 leftover power each.

hour	event	jobs in roll + hour	waiting old queue + in	racks on have power	full cooled	slow too hot	done = coins	dropped over 6	queue left over	battery stored	coins after build	built
